The Mitsubishi 4G9 engine is a series of straight-4 automobile engines produced by Mitsubishi Motors. All are 16-valve, and use both single- and double-overhead camshaft heads. Some feature MIVEC variable valve timing, and it was the first modern gasoline direct injection engine upon its introduction in August 1996.

control units. It includes connector layouts from both ECU and wire sides, typical signal shapes and values, check conditions, and pin labels. Supports search by element name, provides cross-links to relevant wiring diagrams.

MotorData Professional Features

Wiring Whatever you do, don't look at the ECU wire location chart at the back of the Emanage manual. It is completely wrong and is only there to confuse you. The initial installation consists of the same basic connections as an Apex AFC. These are power, ground, rpm signal, throttle position signal, airflow input, and airflow output.
