## Answer Key

selectively permeable membrane.

What is osmosis and diffusion -  
Answers

Osmosis - the diffusion of water (across a membrane) Water will move in the direction where there is a high concentration of solute

# Download Ebook Diffusion And Osmosis Reinforcement

## Answer Key

(and hence a lower concentration of water. A simple rule to remember is: Salt is a solute, when it is concentrated inside or outside the cell, it will draw the water in its direction.
