### *Narwhals Arctic Whales In A*

*The narwhal or narwhale (Monodon monoceros) is a medium-sized toothed whale that possesses a large "tusk" from a protruding canine tooth. It lives year-round in the Arctic waters around Greenland, Canada, and Russia. It is one of two living species of whale in the family Monodontidae, along with the beluga whale. The narwhal males are distinguished by a long, straight, helical tusk, which is an ...*

*Where to find narwhals in the arctic*

*Any other mammal other than whales or seals would eventually get too cold and die of hypothermia in these conditions. Whales such as narwhals live their whole lives in frigid water being always able to maintain a constant warm mammalian body temperature. Blubber can make up 40% of a narwhals mass.*

*Narwhals of the Arctic Facts and Adaptations - Monodon ...*

*The narwhal is famous for the long ivory tusk which spirals counter-clockwise several feet forward from its upper lip. The tusk is actually the whale's upper left canine tooth. Male narwhals commonly have a single tusk, but they sometimes have two tusks, or none at all. Around 15% of females have a tusk.*
