Amazon.com: Stone Vessels of the Cyclades in the Early ...

The Cyclades islands of Greece are renowned for the unique white marble vessels and idols produced at a similar time in the Greek Early Bronze Age (circa 3200-2200 BC) and the Cycladic marble kandila pictured is a fine example from the Grotta-Pelos phase. Carved from glowing white marble, the effort to hollow out these stone vessels must have been considerable.

Stone Vessels of the Cyclades in the Early Bronze Age By ...

With the kandiles, the low and wide plates which can be compared to our fruit plates are one of the most distinctive forms of Cycladic stone vessels. The purpose of these plates is unclear, but most of the examples whose provenance is known were found in necropoleis, often associated with marble figurines; this might suggest that they could have served as cult vessels during the funerary banquets.

The Cyclades are made of more than two hundred small islands with the most important being Naxos, Melos, Paros, Thera, Siphnos, Ios, Kea, Andros, Tenos and Mykonos. The islands display evidence of settlement from as early as 5000 BCE, most probably by voyagers from Asia Minor.

Cyclades - Ancient History Encyclopedia

The vessels were finished by grinding with an abrasive such as sand or emery imported from Naxos in the Cyclades. The inside of the vessel was carved out using a copper drill turned with a bow and once again using an abrasive. The drill was hollow and so the residual core of stone was then snapped off and the work finished using a second drill.
