My sons Astra-H 1.4sxi 16v is running sweet as a nut, but it needs engine coolant top-up at frequent intervals. It uses about 1/3 of a litre every month or so. It's been like this since we bought the car 2 years ago and seems to be getting progressively, but very slowly, worse. No sign whatsoever of any engine oil emulsification.

Astra using excessive coolant. — Digital Spy

It is a website which seems to list every Vauxhall Vehicle and its components with exploded diagrams of all the cars parts and the relevant GM Part number. Antifreeze is essential to keeping your car running smoothly during the winter months. Antifreeze lowers the freezing point of the water in your car's engine cooling system, preventing the water from freezing when the mercury drops. If the water is allowed to freeze, it could damage your engine once it's heated up, resulting in costly repairs.
