While Alzheimer's is the leading cause of dementia, vascular dementia, which is often caused by stroke, accounts for about 17% of all dementia cases. While people will experience dementia differently, most people with dementia share some of the same symptoms that may come and go.

Can Dementia Come And Go? | Home Care Assistance

It is normal for memory to deteriorate a little as we get older: this doesn't necessarily mean we are developing dementia. It is normal for memory not to work well when we are distracted or concentrating on too many things at the same time. That's why memory lapses are more common if we are stressed. Physical and mental illness can all temporarily affect memory too. Who gets dementia?
